Unity Health Plan – UW Health	UU
Valley Health Plan	V

HOW TO USE THIS MAP

- See the Plan Codes above to determine which plans are in your county.
- If the plan code is underlined and in **bold** type in a county, it means that the plan is “**qualified**”. To be qualified, a plan must meet minimum provider availability requirements (based on primary care providers, hospital, pharmacy, chiropractor, and dentist if dental is offered by the plan).
- If a Plan Code appears in a county but is not underlined and in bold type, it means that the plan has at least one primary care provider in that county but is not a qualified plan. You may select that plan but make sure that it has sufficient providers in your area to meet your needs.
- You may enroll in any plan regardless of where you live (except for SMP), but if you enroll in an HMO, you must receive care from that plan’s providers. You are expected to receive your medical care in the county in which your primary care provider is located.
- SMP is available in counties where there is no qualified plan. There may also be non-qualified plans available in those counties. Your eligibility for SMP depends on your county of residence.
- Contact the health plan directly if you have questions about the number or location of providers. The plans’ telephone numbers are shown on the inside back cover.

THE STANDARD PLAN AND MEDICARE PLUS \$100,000 ARE AVAILABLE ANYWHERE AS THERE ARE NO PROVIDER RESTRICTIONS. As such, these plans do not appear on the map.
